

An MLNode object:

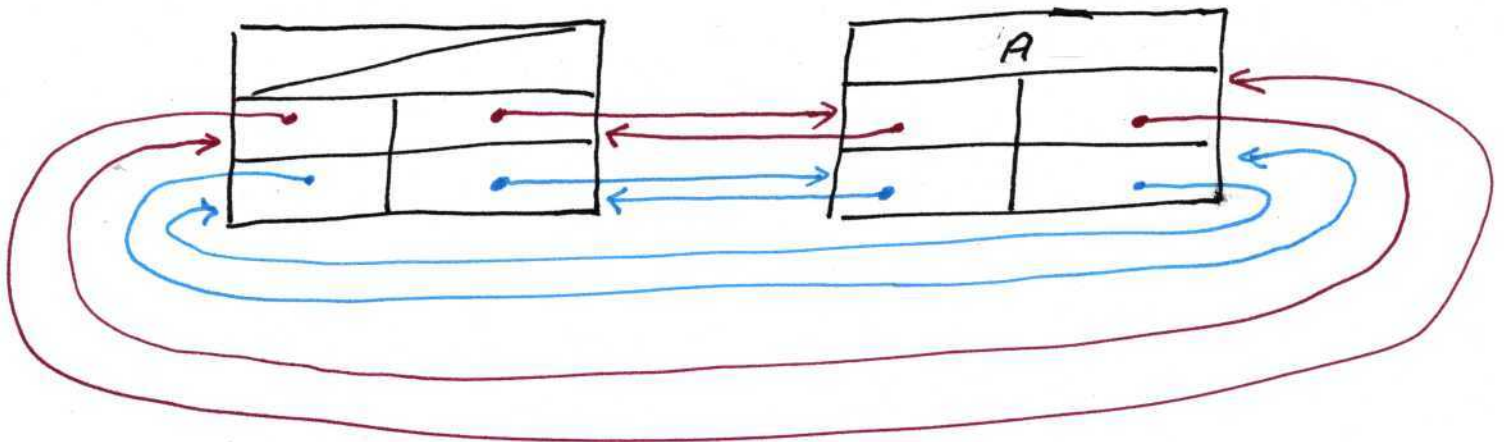

An Empty Ordered MRUList<String>

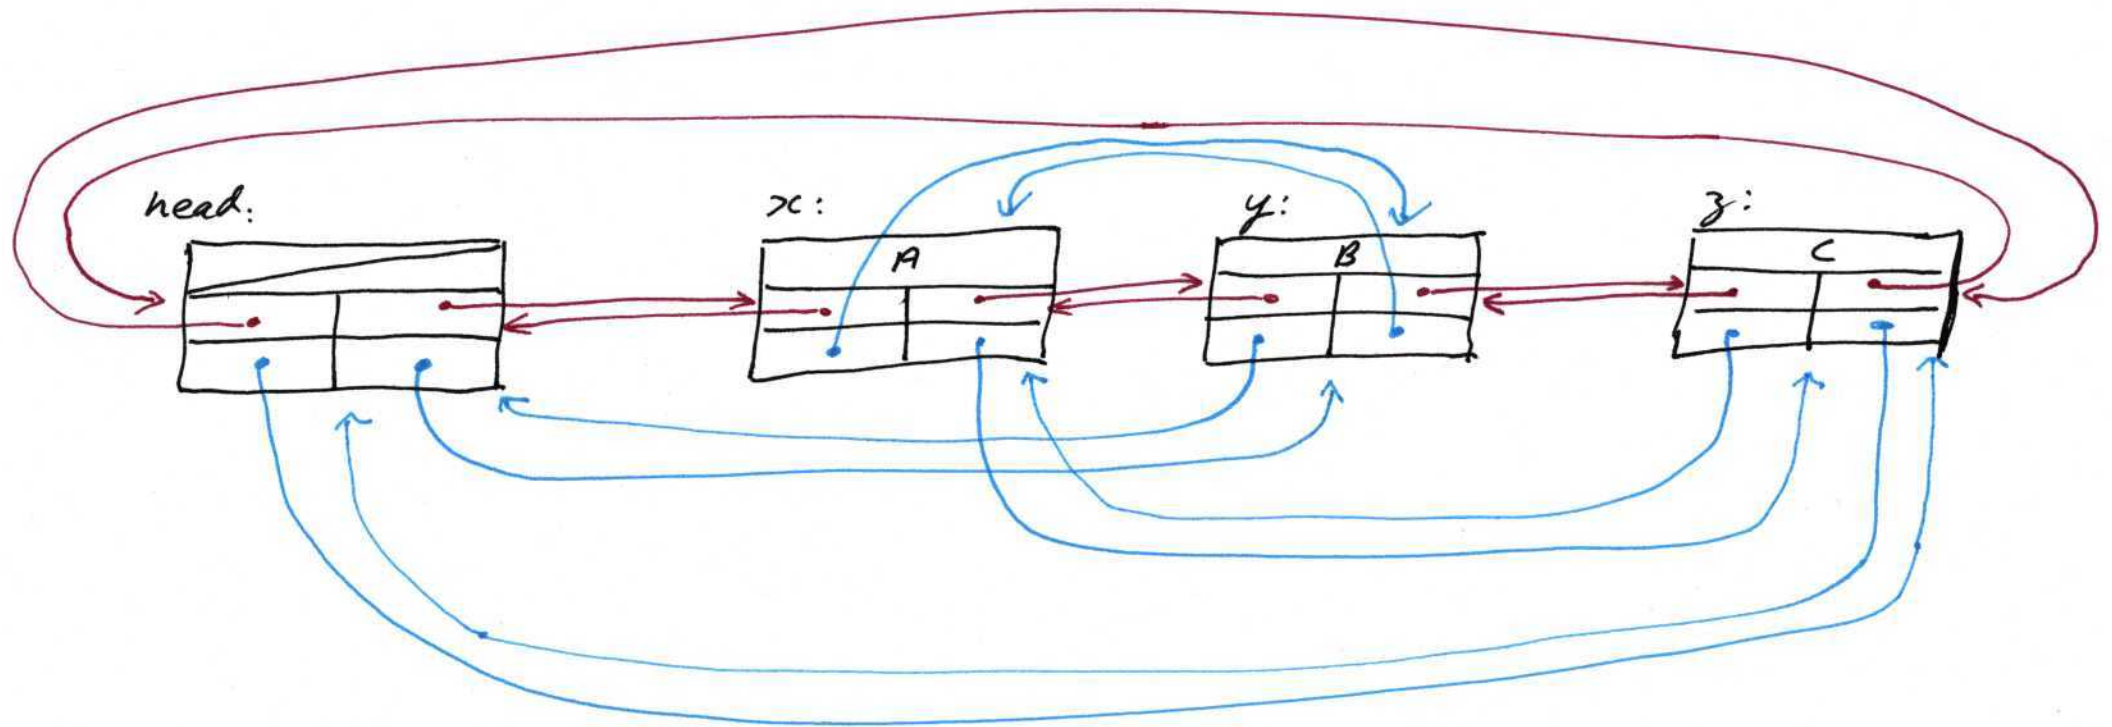

An Ordered MRUList<String> with a single element x containing the item "A"

head:

x :

An Ordered MRUList<String> with 3 elements, x, y and z, containing items A, B and C respectively. Note that the ordered sublist must be correctly ordered, while the MRU sublist may have an arbitrary order

So the ordered sublist contains A - B - C
and the MRU sublist contains B - A - C
